

BALLERINA

BALLERINA is used to remove heavy soiling in kitchen and bathroom areas. It is ideal for removing soap scum deposits, grease and fat build ups.

FEATURES & BENEFITS

BALLERINA is a pink opaque liquid with a fresh lemon fragrance. BALLERINA is used to remove heavy soiling in kitchen and bathroom areas. It is ideal for removing soap scum deposits, grease and fat build ups, etc.

BALLERINA combines a non-scratch calcite abrasive with a blend of detergents for effective safe cleaning on all surfaces in the kitchen and bathroom.

With its fresh marine fragrance and no dust it is much more pleasant to use than powdered abrasive cleaners.

HOW & WHERE TO USE

BALLERINA can be used on laminex, ceramics, cooker tops, saucepans, glass, baths, basins, and stainless steel.

Either squirt onto a damp cloth and rub into the surface, or squirt directly onto the surface and rub in. Use BALLERINA sparingly as a little goes a long way, and if too much is used it will only create extra work in rinsing away.

As well as being a great cleaner on all normal kitchen and bathroom surfaces, BALLERINA is also suitable for removing burnt on deposits off barbeque plates, saucepans, etc. Simply squirt onto the wetted surface and scrub with a scourer.
