

The Mr Nomarks range consists of 'Carpet Master' Carpet Spotter, 'Fabric Master' Fabric Spotter and Fabrisan for effective odour control for Carpet and Upholstery.

Whiteley
Corporation

The **Mr Nomarks** range consists of “Carpet Master” Carpet Spotter, “Fabric Master” Fabric Spotter and “Fabrisan” for effective odour control.

Mr Nomarks CARPET MASTER is a carpet spot cleaner which is ideal for cleaning spots, spills and ground-in dirt. It inhibits carpet re-soiling and is easy and safe to use. Carpet Master can replenish soil and stain resistant properties on a wide variety of common carpet, including stain resistant, synthetic and wool carpets. Always adhere to the directions for use on the bottle before application. Carpet Master is not suitable for fabric or upholstery.

Mr Nomarks FABRIC MASTER is a fabric spot cleaner which is suitable for use as a ‘general purpose’ fabric spotting detergent. It inhibits fabric re-soiling on your upholstery. Always adhere to the directions for use on the bottle before application.

Mr Nomarks FABRISAN is a revolutionary carpet and upholstery deodouriser that contains Natural Australian Tea Tree Oil. Fabrisan will eliminate almost any odour. Compatible for use on Stainmaster® Carpets, Fabrisan is suitable to use on all types of carpet and upholstery. Fabrisan is effective in removing mould and spores and eliminating urine odours. Mr Nomarks Fabrisan dries to a non-staining, non-toxic residue that can be easily vacuumed away. Always adhere to the directions for use on the bottle before application.

Please Note:

Before removing any stain, test and stain-removing product (including water, if you plan to use it) on an inconspicuous area of the carpet or fabric. This is to ensure that there are no adverse effects between the cleaning solution and the fabric/carpet, for example colour bleed.

For best results when using the **Mr Nomarks** product range follow the instructions below:

1. Flip back spray head.
2. Remove yellow tag.
3. Replace spray head to ensure product is applied with the foaming nozzle.
4. Remove any excess soil or loose dirt from the surface, or if a wet spill blot the affected area with a clean colourfast cloth. Do not scrub.
5. Lightly spray **Mr Nomarks** approximately 15-20cms from the surface directly onto the effected area (do not over-wet the carpet or fabric).
6. Gently blot from the outer edge towards the centre of the stain with a clean, colourfast, damp cloth.
7. Rinse cloth and repeat until stain has disappeared.
8. Carpet/fabric dries in approximately 20 minutes.

Cleaning Tips

In general, most furnishings, fabric and carpet can be kept looking beautiful by following three simple steps:

- Clean up spills promptly
- Clean and vacuum on a regular schedule
- Periodically have your carpets and upholstery professionally cleaned

Before removing any stain, test any stain-removing product (including water, if you plan to use it) on an inconspicuous area of the carpet or fabric. This is to ensure that there are no adverse effects between the cleaning solution and the fabric/carpet, for example colour bleed.

Always consult professional carpet or upholstery cleaners before attempting to remove any stain from your carpet or fabric.

Safety and the Mr Nomarks Product Range

Whiteley Corporation has formulated the Mr Nomarks product range with the intention of providing the utmost care and safety for each and every customer.

Safety is of primary importance to Whiteley Corporation in everything the company manufactures, that's why we have outlined events that could potentially occur whilst using the Mr Nomarks product range.

Unfortunately, there is no way of predicting an individual's response to cleaning products. All cleaning products have a potential to cause skin and other irritation in susceptible individuals, which is why direct physical contact with the skin should be avoided. If irritation occurs when using the Mr Nomarks product range or any other cleaning solution, remove the individual from direct contact with the solution until a satisfactory, safe working environment is determined.

Natural Australian Tea Tree Oil (TTO) has been used in the Mr Nomarks Fabrisan formulation at less than 1%. TTO was found to be the superior raw material for its purpose in the formulation against all others tested. The TTO odour lasts for approximately 5-15 minutes after application.

The Tea Tree Oil smell has no adverse health effects at this concentration, however, if individuals are sensitive to the TTO odour, ventilate the room. Discontinue use if adversely affected. Mr Nomarks Fabrisan dries to a non-staining, non-toxic residue that can be easily vacuumed away.

It would be beneficial for those using Mr Nomarks products to read the Material Safety Data Sheet (MSDS) prior to first use. To download the latest edition of each Mr Nomarks MSDS visit Whiteley's web-site at www.whiteley.com.au or alternatively phone 1800 833 566.

Safety Directions are generally as follows:

Skin Contact: Wash skin thoroughly with water.

Ingestion: Do not induce vomiting. Give a glass of water. Seek medical advice.

Eyes: Flush with water for at least 15 minutes.
