

PRODUCT INFORMATION SHEET

SPOT ON

LIQUID PRE WASH STAIN REMOVER

FEATURES

- SPOT ON is a clear colourless liquid with a fresh orange odour. It is used neat for pre-treating stains such as grease, oil, cosmetics, inks, etc. before washing, making them much easier to remove.
- SPOT ON contains a blend of solvents and detergents that assist with the removal of a wide range of different stains.
- With its fresh orange odour it is much more pleasant to use than many prewash products which contain a lot of liquid hydrocarbons.
- SPOT ON is much more economical to use than aerosol products as it can be refilled from a bulk container.
- SPOT ON is also much better for the environment as the trigger spray is refillable, and there are no hydrocarbon propellants to add to the Greenhouse effect.
- SPOT ON is designed to remove oily soils and solvent soluble soils such as ink and paint.

HOW & WHERE TO USE

- SPOT ON is ideal for cuffs and collars (which contain oils from the body), cosmetics, greasy food soils, and will remove some ink and paint, especially if very fresh. SPOT ON is brilliant for mineral oils (such as engine oil), with its high solvent content will give the best results.
- Spray over stain and leave for at least 1 minute before adding to wash. For bad stains such as ink, paint or heavy deposits, leave for 10 minutes before adding to the wash.
- Use in a well ventilated area. Do not spray over fresh paint work.

DISCLAIMER

Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven to be defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user.
